567 them for kola nuts with the Achanti [Ashanti] or for loaves of salt
439 at Timbuktu. Although they were always transported by roundabout routes to prevent them from finding their way back to their homes, still some of them always managed to escape.

492 The naba used the young yemdado as soroné or grooms, and
567 they would often [93] take the young and attractive women (yempoksé) as wives.

641 The sale of free men. Neither the emperor of the Mossi nor
681 his vassals sold their subjects. Individuals who were regarded as dangerous were simply put to death unless they took refuge in a bangaré to avoid being executed, as has been noted above. Some were sent to the emperor to be made into eunuchs.

304 The facial tattoos worn by the Mossi clearly distinguished them
567 from neighboring peoples. However, if by accident or because of
689 need a naba sold a free man and the latter was claimed by his relatives, the chief was required to buy back the slave or to indemnify his family. We have described above how a canton chief was exiled by the emperor for having sold free Mossi.

583 Concealed selling of women and children. In the chapter on
562 marriage customs among the Mossi we shall show that a native
567 Moaga did not demand a bride price because he did not want to feel that he was selling his daughter. There is no doubt that this rule has exceptions. Indeed, we shall show that the failure to pay a debt, a bout of drunkenness, or a favor received might suffice to mortgage the future of a daughter, even though at the time she might be a small child and quite unaware of her fate. In any event, there would be no question of her expressing any opinion, since her wishes are never taken into account. During periods of famine -- which have been
●[731] occurring almost [94] regularly for some years -- a small basket of millet is enough to make a father promise his daughter. In the same way, we regret to say, a great many girls are promised in exchange for trifling sums at the time the poll tax is paid.

567 Rights of slaves. Since he is regarded as an inferior being, the yemdaogo (slave) has no well-defined rights. He is required to perform all kinds of domestic work and must give unquestioning obedience to his master and the master's family. Besides his essential duties, however, he is permitted to do some farming for himself, practice some trade, or to raise cattle, with the proceeds constituting

672 "If the insane person still has a father, it is his duty to warn the people of the neighborhood.

"All the deeds made, the debts contracted, and the commercial transactions effected by the insane person are declared void. No third parties may appeal against members of the insane person's family."

000 Now let us deal with the appendages of the family.

We shall divide this section into the following headings.

1. Clients.
2. Domestic servants.
3. Slaves. Their origins.
4. Slaves. Name.
5. Slaves. Kinds of slaves.
6. Serfs.

Let us begin with the clients.

464 1. Clients. The usual clientage involving a household which requests support, protection, food, and shelter from a rich family, in return for which the household will labor for the family and live with it, is not to be found among the Mossi and Foulsé of Yatenga. It does happen, however, that a young man who desires to acquire quickly a wife, a horse, some property, or an amount of authority which does not usually revert to young men decides to leave his family and his compound to place himself in the service of some chief (Moro Naba, canton chief, village chief, tengasoba, etc.). It is the young men, rasamba, who make such decisions. Once they have won what they sought to obtain, however, they return to their families. When one goes to a tengasoba, he usually expects only a wife from him, and he does not leave until the tengasoba dies. Then, provided with a wife, he returns to his family. Naturally, these "temporary volunteers" preserve all their rights in their respective families.

464 Let us note further that during times of famine some Mossi request work from people of better means. The duration of their work is 731 usually very short, scarcely more than a few days (two or three days, for example).

464 The employee and employer (if these terms may be used here) are in no way bound to each other. The former may leave whenever he wishes, and the latter may dismiss him as he pleases. He must, however, pay for the employee's work days in full. The daily

between the living and the dead," but also to strengthen the political bonds between the Mogho Naba and his chiefs, down to the humblest elder of a Mossi compound.

In addition to the Basgha and Tense, the Mogho Naba of Ouagadougou appears to have offered another yearly sacrifice to Tenga. Each year, after the Basgha, the Mogho Naba, the Baloum Naba, and a large entourage reportedly visited a large earth shrine called Tantibo in the vicinity of Sabatenga to offer propitiatory sacrifices in the name of all the people. When the royal party arrived at Sabatenga, they were joined by the Sabatenga Naba and his Tengsoba. The group proceeded to the foot of the sacred hill, and here the monarch dismounted, took off his bonnet and shoes, and climbed the hill. He made the customary Mossi salute at the shrine and looked on silently while the Tengsoba sacrificed animals and poured libations of millet beer and millet water in supplication for the health and prosperity of the Mogho Naba and all his people.[7]

When evil befell Mossi country in spite of the annual sacrifices to the ancestors and to the earth deity, the Mogho Naba had to offer additional sacrifices. If the country was plagued by drought, the ruler went to an earth shrine in Ouagadougou itself, called "Kom be paspanga" (literally, "water is strong there"), for a sacrifice. Moreover, he might order all his district and village chiefs to perform similar sacrifices to the earth shrines within their territories. In Nobere district, for instance, the district chief went to the village called Barkago, where, standing barefoot and bareheaded on the hilly shrine known as Beta, he ordered the local village chief and the Tengsoba to offer sacrifices for rain and good health.

It is generally believed by the Mossi that when the French attacked Ouagadougou, the deposed Mogho Naba Wobogo made sacrifices to earth shrines. Tradition has it that he sacrificed a black cock, a black ram, a black donkey, and a black slave on a large hill near the White Volta River, beseeching the earth goddess to drive the French away and to destroy the traitor Mazi whom they had placed upon the throne. When Mazi died, the Mossi people believed that he had received his just deserts from the earth shrine for treason. The French believe that Mazi was poisoned.[8]

The district and village chiefs, like the Mogho Naba, were required to make propitiatory sacrifices to the earth shrines on behalf of their subjects. Before taking office, a district chief was ritually shown the major earth shrines in his territory, and he could not ignore their existence and their need for sacrifices. In a country with major local variations in rainfall and localized animal and human epidemics, the Tengsobadamba of stricken areas always called upon the local chiefs to help them propitiate disgruntled spirits.

people also assemble sheep of
the Mossi variety, which are very puny. The larger variety of long-haired Macina sheep are seldom exported. Once the livestock has been assembled, the chief of the caravan would also provide himself with cotton bands. This native fabric has often been described; it is commonly used on the caravan routes to pay for the food of the travellers. (Marc 1909 : 172)

Most of the caravans through Mossi country traveled as much as fifteen or twenty miles a day. They left at the first sign of dawn, traveled steadily until the heat became too intense, and then stopped to rest. They resumed their march when the sun was midway between the zenith and the horizon, and then stopped at some village or stream for the night. This schedule was followed on the next day if the caravan was far from a market center, but in the vicinity of a large market the caravan might remain stationary as many as six days while its merchants traded for more livestock or merchandise. This being the case, it is difficult to gauge how long it took the caravans to make the journey from Salaga in Ghana to Timbuktu. Our best data come from an analysis of Krauss' itinerary. He left Salaga with a caravan on July 7, 1885, heading north through Walwale, and arrived in Bere, a distance of some 250 miles (today's road mileage) towards the end of August. Famine delayed the caravan at Bere for some time, and he did not complete the 50 miles or so to Wagadougou until September 24. He remained in the Mossi capital until October 26, some thirty-two days, before his caravan headed north again through Tema, Yatenga and Bandiagara. Krauss does not tell us when he reached Douentza, some 400 miles northweast of Wagadougou, or how long he remained there, but on December 7, a few days after he had left Douenzta on the last 200- or 250-mile leg of his voyage to Timbuktu, the Moro Naba ordered him to return to Wagadougou. It is possible that it took Krauss' caravan some thirty-five odd days to make the trip from Wagadougou to Douentza. His return to Wagadougou took him only about thirty days, since he arrived there on January 7, 1886. He apparently had to wait some fifteen days there for a caravan going south, because he did not leave the Mossi capital until January 22, 1886 (Krause 1887–88). Judging from this itinerary, it probably took caravans between five and six months to travel from the forest zones to the desert, a distance of about a thousand miles at the most. This averages about six or seven miles a day, with the normal stops for rest and marketing, instead of the fifteen or twenty miles a day which the average caravan covered when it was on the road.

The caravans did not encounter many dangers or difficulties during their voyage. When the caravaneers had friends along the way they stopped at their friends' homes for the night, and when they camped in uninhabited places men were posted to protect the goods and livestock against marauding beasts and thieves.
